

CRIMEOPHOBIA DEFENCE

DEFINING PREDICTIVE POLICING & ANALYTICS

TRANSNATIONAL ORGANISED CRIME AND DEFENCE

CORPORATE PROFILE

OUR CORE COMPETENCIES

Crimeophobia is globally the pioneer of 'A Criminology Firm' founded by Criminologist Snehil Dhall which is based on the scientific study of crime and criminal behaviour that requires penal treatment as per the motives, intentions and situation of every case.

Crimeophobia's focus on Defence Sector is specifically for the 'Battlefield Management System' that develops Psychological Warfare techniques to counter conflicts at Border, Homeland, Corporate and domestic locations.

Medical Diagnostic Report	Criminology Crime Report
Patient chooses doctor or self-diagnoses themselves by taking medicines from chemist.	Client chooses lawyer, politician, and activist or self-diagnose themselves referred as party-in-person.
Type of Medical remedy from Ayurveda, Homeopathy, and Allopathic.	Justice based on Fame, Money, and Power driven.
Selection of Hospital.	Selection among Police, Court, Media, anti-social elements or relevant departments.
Medical Tests/Reports are required at every stage from the beginning of the ailment till death certificate that refers the cause of death.	Criminology Evaluations/ Reports are required at every stage as every criminal behavior requires psychological answers till the case ends just like court proceedings for case laws.

Crimeophobia Defence is meant for the Government & Corporate sectors as it has been design to focus needs of Security Forces to initiate a Psychological Warfare Unit. We ideally fit in the gap of technology based modernization that is subjected to Human Intervention in which we can deal with the stakeholders from a distance or physically to resolve the dispute in hand.

It is considered that 'Terrorist want more people to watch than die', however, such motives continue to change as per the analytical factors during an ongoing battlefield which could be at private sector, public sector, and/or defence zones. Our responsibility is to deliver the crime report similar to medical report in which its up to the patient and/or client to choose their options without creating any rift in the existing system.

OUR SERVICES

ROOT CAUSE SOLUTION METHODOLOGY

We provide a prescriptive & predictive model of our legal options that allows our clients to have the liberty to conclude their decisions of which legal platform to opt for. Crimeophobia Defence has been initiated for National Security & Counter-Terrorism which is linked to 7 core analytical commands required for a tactical and psychological warfare unit.

The command for this unit is based on the theoretical framework of Criminologist Snehil Dhall (Founder) called 'Theory of Modern Chakravyuh' and 'Polymath Theory of Organised Crime' covering the aspects of Crime, Society, Culture, Terrorism, Politics, Media and Policing. We have observed that, just like Gangsters / Underworld of Mumbai had subsequently become Builders or Politicians, currently Terrorist groups of various countries are creating Transnational Government as their sympathizers are in various countries for protesting in the theme of 'Nations without States'.

To counter this format, our strategic framework has been initiated and displayed in form of Criminal Writ Petition with the Hon'ble Supreme Court of India for implementing 'United Nations Transnational Organised Crime'. This is one of our case study that reflect the core requirements of our 'Neurocriminology Predictive Policing & Warfare Unit' in the future of Defence structure modernization.
